

REMARKS

The present Preliminary Amendment is submitted for the purpose of correcting typographical errors and to bring the specification in line with the drawings. In particular, the specification as originally filed inconsistently referred to "computer readable memory" by reference numerals 34 and 35. The amendments above correct the specification to consistently refer to "computer readable memory" by the reference numeral 34. No new matter has been added by these amendments. If there are any further matters that can be discussed by telephone to further the prosecution of this application, Applicants respectfully request that the Examiner call its attorney at the number listed below.

Respectfully submitted,

Roger A. Heppermann
